$9 - 7 = 2$

# Addition Word Problems

## Answers

1. After digging in his backyard, John found seven coins for his collection. If he already had nine coins, how many coins did John have after the new ones?  
*9 coins + 7 coins = 16 coins. John's collection now has sixteen coins. Now what were those coins doing buried in the back yard?*
2. Mary and Lucy are planning on joining forces to have the most amazing doll house on the block. If Mary has six dolls, and Lucy has five, will they be able to beat Stephanie's eight-doll house?  
*6 dolls + 5 dolls = 11 dolls. They had eleven dolls together, which is greater than Stephanie's eight. They had the best doll house in the block by far!*
3. Joshua told his friend that his sister is nine years older than himself. If Joshua is nine at the moment, how old is his sister?  
*9 years + 9 years = 18 years. Joshua's sister is eighteen years old.*
4. Mickey is a little behind in his work. He has four math questions to answer plus nine questions for geography. How many questions does he have to answer?  
*4 questions + 9 questions = 13 questions. He has thirteen questions to answer.*
5. There are five blocks from Eric's house to Andy's house, and another five from Andy's house to the school. How many blocks does Eric walk each morning, if he always picks up Andy on his way to school?  
*5 blocks + 5 blocks = 10 blocks. Eric walks ten blocks each morning. Now imagine if Andy had to pick up Eric every morning!*

# Addition Word Problems

6. Susan's grandpa told her in one of his stories, "There we were, all six brothers and seven sisters running away from a 'gator". Susan couldn't believe her ears. How many siblings were escaping from the alligator, according to her grandfather?

6 brothers + 7 sisters = 13 siblings. Thirteen siblings were escaping from the alligator. Of course Susan's grandpa told a lot of exaggerated stories!

7. Dylan grew three inches taller last year, and five inches taller this year. How many inches taller did Dylan grow in the last two years?

3 inches + 5 inches = 8 inches. Dylan grew eight inches taller in the last two years.

8. During arts and crafts, Noah thought he could make a twelve-wheeled toy car. He took a regular toy car, and glued seven wheels to it. Did he make a twelve-wheeled car?

4 wheels on a regular toy car + 7 additional wheels = 11 wheels. There were only eleven wheels, so he didn't make a twelve-wheeled toy car. The new wheels didn't move, since they were glued, so really there wasn't much point.

9. For her birthday, Donna really wanted some binoculars, but her dad bought her five pairs of socks instead. She already had eight pairs of socks. She didn't even wear socks, so she gave all of them to the thrift shop. How many pairs of socks did she give away?

5 pairs of socks + 8 pairs of socks = 13 pairs of socks. Donna gave away thirteen pairs of socks. The thrift store owner was so grateful, she gave Donna a pair of old binoculars for free.

10. Mark really likes cold drinks, so when he saw that his mother had put only four ice cubes in his juice, he had to put in six more. In the end, the juice was not only cold, but watery. How many ice cubes did Mark put in his juice altogether?

4 ice cubes + 6 ice cubes = 10 ice cubes. The question, however, asked how many ice cubes Mark put in, so the correct answer is "Mark put 6 ice cubes in his juice," since his mother put in the first four.

# Addition Word Problems

11. Quinn is not a slow runner, but she likes to take her time and look at the scenery. During a long race, she ran three minutes slower than everyone else. If the next-to-last time was six minutes, how much time did Quinn take to finish the race?

*3 minutes + 6 minutes = 9 minutes. Quinn finished the race in 9 minutes.*

12. Someone has been leaving flowers in front of Leonard's door! There were seven roses yesterday, and eight daffodils today. What are his friends going to say, and how many flowers are there anyway?

*7 roses + 8 daffodils = 15 flowers. Fifteen flowers were left on Leonard's door step. The flowers were actually for Leonard's big sister.*

Solve each problem. Show your work in the box.

1. Eugene noticed the temperature had dropped by 8 degrees from 17. What was the new temperature?

$$17 - 8 = 9$$

2. Theresa had \$12 and she spent \$7. How much did she have left?

$$12 - 7 = 5$$

3. Judy was watching a new tv series that had 12 episodes. She already watched 6 episodes. How many more did she have to watch?

$$12 - 6 = 6$$

4. Noah took pictures of different lizards for a science project. He wanted 20 pictures altogether, but he only had 11 pictures so far. How many more pictures did he need?

$$20 - 11 = 9$$

## Subtraction Word Problems (B) Answers

Solve each problem. Show your work in the box.

5. Together, Russell and Denise, owned 15 pairs of shoes. Denise owned 8 pairs. How many did Russell own?

$$15 - 8 = 7$$

6. For a dog competition, Dylan was teaching his dog 13 different tricks. His dog could already do 8 tricks. How many more tricks did his dog have to learn?

$$13 - 8 = 5$$

7. Jane was helping her mom build a deck. Her mom needed 17 boards and Jane had already brought 10. How many more did she have to bring?

$$17 - 10 = 7$$

8. Howard and his dad were cooking dinner for the family. His dad wanted Howard to peel 24 potatoes. He looked at his pile and counted 12 already peeled. How many more did he still have to peel?

$$24 - 12 = 12$$

Solve each problem and show your work.

Mattie and her brother Axton built a square foot garden with a different vegetable in every square. If their garden was 5 rows by 9, how many different vegetables did they have?

5 vegetables per horizontal row x 9  
vegetables per vertical row = 45  
vegetables per garden

Keyla's exercise routine includes 8 burpees a day. How many burpees does she do every week?

8 burpees per day x 7 days per  
week = 56 burpees per week

Hugo mowed lawns last summer and made \$9 each time he mowed Mr. Derocher's lawn. How much did it cost Mr. Derocher to have his lawn mowed 6 times?

\$9 per mow x 6 mows = \$54

Melvin is in a group of 6 friends. Last Saturday, they went to the county fair and they each spent \$8. How much did the entire group spend at the fair?

\$8 per friend x 6 friends = \$48  
spent at the county fair

## Multiplication Word Problems (C) Answers

Solve each problem and show your work.

On Tuesday, Deandre laughed because he had 7 friends send him exactly 7 text messages each. He showed his mother, and she said, "You got \_\_\_\_ text messages in a day! I don't get that many in a week!" Fill in the blank with the correct number.

$$7 \text{ text messages per friend} \times 7 \text{ friends} = 49 \text{ text messages}$$

Since Lia was 10, her mother said that she could help out with the chores by washing her age in dishes every night after dinner. How many dishes does Lia wash every week?

$$10 \text{ dishes per day} \times 7 \text{ days in a week} = 70 \text{ dishes}$$

Beckham told his friend, Kenya, that he would give her \$9 for each of her 9 paintings. How much would it cost Beckham for all the paintings?

$$\$9 \text{ per painting} \times 9 \text{ paintings} = \$81$$

Griffin was making a "house" out of Popsicle sticks. Each level of the walls took 4 sticks and he wanted to make his walls 10 levels high. How many sticks did he use for the walls?

$$4 \text{ sticks per level} \times 10 \text{ levels} = 40 \text{ sticks}$$
